Modernising complex operations while strengthening governance, resilience and risk discipline

Singapore · +65 8907 0735 · guhadeepanjan@gmail.com · linkedin.com/in/deepanjanguha · deepanjanguha.work

EXECUTIVE PROFILE

One pattern runs through 20 years and five regulatory regimes: modernise complex operations while strengthening governance, resilience and risk discipline. A national payments migration delivered without customer disruption. Scaled AI from proof of concept into production within a regulated banking environment, followed by appointment to the MAS MindForge AI Governance Taskforce. Nine consecutive years without a significant regulatory finding while leading large-scale transformation programmes, not by avoiding change but by engineering it properly.

LEADERSHIP IMPACT

- Modernises operating models across international businesses, using automation and offshore capability to remove cost without weakening control.
- Consistently delivers large-scale transformation programmes while strengthening governance, regulatory compliance and control effectiveness.
- Chosen to lead high-impact programmes involving national payments infrastructure, AI adoption and multi-jurisdiction regulatory engagement.

EXECUTIVE SIGNATURE

Leadership philosophy: sustainable transformation succeeds only when governance, technology and people evolve together. This philosophy has shaped two decades of operational modernisation across regulated financial services, strengthening regulatory confidence, customer outcomes and organisational resilience.

More clockmaker than timekeeper, designing systems, teams and control environments that continue to perform long after implementation.

CAREER SUMMARY

Chief Operating Officer / Head of Operations	ICICI Bank, Singapore	2020 – Present
Head of Operations, International Group	ICICI Bank, six jurisdictions	2015 – 2020

9 years
without a significant regulatory finding across MAS, RBI, FCA, DFSA and OSFI

Zero disruption
on Singapore's ISO 20022 / MEPS+ payments migration, as operational lead

40% less
manual effort after taking AI and automation from pilot to production

USD 4B+
annual cross-border flows run at 99.9% processing accuracy

PROFESSIONAL EXPERIENCE

Chief Operating Officer (COO) / Head of Operations

July 2020 – Present

ICICI Bank Ltd, Singapore Branch (MAS-regulated)

Provide executive leadership for enterprise operations, governance, operational resilience and transformation across all business lines within a MAS-regulated international banking branch.

- Served as the primary executive contact for MAS inspections and thematic reviews. Four consecutive examination cycles without a critical finding, through the heaviest period of change in the branch's history.
- Redesigned the enterprise operating model by integrating automation, offshore capability and governance, reducing turnaround times by 30% while strengthening control effectiveness.
- Led the branch through Singapore's ISO 20022 payments migration, delivered without customer disruption.

- Embedded AI into production across core operational processes, removing 40% of manual review effort. Represents the bank on the MAS MindForge AI Governance Taskforce, contributing to industry work on responsible AI adoption.
- Executive sponsor for operational resilience, business continuity and outsourcing governance, chairing the respective committees and holding recovery for tier-one functions under one hour.

Head of Operations, International Operations Group

April 2015 – July 2020

ICICI Bank Ltd, Hyderabad, India

- Ran the global capability hub serving branches from Singapore to Canada, holding one operating standard across six very different regulatory regimes.
- Lifted productivity 30% through a Centre of Excellence built on process discipline and technology.
- Managed regulatory engagement across five supervisory jurisdictions, with no significant findings over the five-year tenure.

Chief Manager, Wealth Operations, Compliance & Transformation

April 2010 – March 2015

ICICI Bank Ltd, Hyderabad, India

- Integrated operations, compliance and controls across wealth management, private banking and cross-border payments during a period of rapid business growth.
- Owned HNW and UHNW onboarding review as KYC co-maker, including source of wealth assessment and enhanced due diligence for the highest-risk relationships.
- Delivered FATCA and CRS for the Singapore and Dubai branches on an aggressive timeline. The audit record stayed clean for six consecutive years.

Product Manager, Global Remittance Operations

June 2005 – March 2010

ICICI Bank Ltd, Mumbai, India

- Conceptualised and scaled Money2India, one of India's first large digital cross-border remittance platforms, to more than USD 4 billion in annual flows at 99.9% accuracy.
- Built its compliance and fraud architecture from the ground up, with zero regulatory lapses across FATF, RBI and MAS frameworks.

PROFESSIONAL RECOGNITION

- EFMA Awards nomination, with Accenture, for an AI and voice-recognition based first-call resolution solution.
- Appointed bank representative to the MAS MindForge AI Governance Taskforce and branch lead for the Pathfinder AI Programme, national initiatives on responsible AI adoption in financial services.
- Opera Award, ICICI Bank's group-level recognition, for delivering FATCA implementation across the Singapore and Dubai branches within the regulatory deadline.
- Quest for Quality Award, twice: for total digitalisation of the Singapore branch, and for rate tolerance controls adopted across all international units.
